SUMMARY

Aspiring Back End Developer with a strong foundation in web technologies and a passion for continuous learning. Experienced in leading small development teams and fostering collaboration to achieve project goals. Currently focused on advancing toward a Fullstack Web Developer role by deepening skills in both server-side and front-end development.

RELEVANT EXPERIENCE

Software Engineer

Freelance

August 2024 - Present

Worked on various client-based web projects, handling both backend and frontend development tasks, including system design, feature implementation, debugging, and deployment. Ensured each solution met the client's specific business needs and maintained good scalability and maintainability. One notable project was Infinity Label, a company profile website for an OEM manufacturing service provider that acts as a third-party producer. The site was designed to communicate the client's production capabilities and streamline their digital presence with a clean, responsive layout.

Backend Developer at Teaching Factory SMK Telkom Banjarbaru

Apprenticeship

September 2024 – February 2025

Responsible for developing RESTful APIs using Laravel to support a cooperative mobile application. Key features implemented include data management, money transfers, balance top-ups, withdrawals, and loan processing. Conducted thorough API testing with **Postman** to ensure stability and seamless integration with the frontend developed by other team members.

Team Lead at PT Tanjung Alam Jaya

Internship

November 2024 – February 2025

Led the development team during an internship, overseeing the progress of two mobile applications and one company profile website with an integrated admin panel. Acted as both backend developer and DevOps, responsible for developing and integrating APIs, ensuring reliable system connectivity, managing server deployment, and performing system testing and debugging. Also contributed to technical documentation and coordinated collaboration within the team to meet internal operational goals.

Frontend & Backend Developer Cohort at Dicoding Coding Camp powered by DBS Foundation

Apprenticeship

December 2024 – May 2025

Participated in an intensive apprenticeship program under the Frontend & Backend Developer Cohort. Gained hands-on experience through real-world project development and collaborative teamwork. Served as Team Leader during the capstone project, responsible for coordinating development tasks and ensuring project delivery. Graduated with Distinction and awarded Best Capstone Team Project at Coding Camp Powered by DBS Foundation 2025.

RELEVANT PROJECTS

Tabalong Husada – Clinic Website with Admin Panel

Freelance Project

August 2024 – November 2024

A profile website developed for Tabalong Husada Clinic to improve its digital presence and service accessibility. The site presents core clinic information, including services, doctors, and operational hours, while featuring a secure admin panel that allows administrators to manage content and patient-related data. The project emphasized responsive design, accessibility, and ease of maintenance. Built using Laravel, Alpine.js, and Tailwind CSS.

Infinity Label – OEM Manufacturing Company Website

Freelance Project

May 2025

Built a company website for an OEM manufacturer to showcase product lines, manufacturing capabilities, and enable quote requests. Focused on dynamic content structure, responsiveness, and brand consistency using React.js and Tailwind CSS.

Morime – Anime Tracking Web Application

Personal Project

June 2025

Created a simple anime tracking site inspired by MyAnimeList, using public API GET requests to display anime data. Focused on frontend routing, component architecture, and styling with Next.js and Tailwind CSS. Designed as a self-learning project to strengthen frontend skills.
